Linkedin: ezequiel-benitez2203 - Github: eze-quielph

Backend Developer with one year as a backend developer specialized in backend development with typescript. With knowledge in software architecture and cloud with AWS. Experience in developing complete applications as a team, which allowed me to develop skills such as fluid communication and teamwork. English level: A2.

PROJECTS

Full Stack Web Developer - EventoX   Oct. 2023 - Nov. 2023
Academic experience. Henry Bootcamp

Project Development: Development of a marketplace for the sale of event tickets with Dashboards and notification systems

- **Backend architecture:** Responsible for selecting technologies and responsible for developing the backend to support a purchasing system, inventory system and authentication system.
- **Dashboard Admin:** In charge of developing from scratch a Dashboard that allows managing the main application, as well as another that allows controlling events for the users who create them.
- **Frontend:** Integrate Login and API routes of the developed backend

Back-End: NodeJs,Typescript, NestJs, Sequelize.
Base de datos: PostgreSQL, MySql

Link deploy: https://eventox-client-ten.vercel.app/

Full Stack Web Developer - SpotChat   agos. 2023 - Sep. 2023
Academic experience. Henry Bootcamp

Project Development: Development of a music application similar to Spotify, but with the inclusion of an integrated chat for communication between users. Users can also upload their own songs if they pay a membership

- **Design the application architecture:** We encountered a problem with the scaling of our API, which delayed development and reduced the team's performance, which is why I made the decision to take charge of redesigning it under an architecture, this was noticeably beneficial in the development and maintenance times of the code.
- **Cache System:** Implementation of a caching system to optimize application performance and loading speed, ensuring a smooth experience for users.

- **Dashboard Admin:** In charge of developing a Dashboard from scratch that allows managing the main application.

Back-End: NodeJs, Express, NestJs, Sequelize.
Database: PostgreSQL, MongoDb, Redis

PROFESSIONAL EXPERIENCE

Full Stack Developer Junior   Dic 2022 - Mar 2023.
Freelance, Argentina.

- Application development that manages sales
- Inventory control system development

TECHNOLOGIES:

Programming languages: Typescript y Javascript
Framework Tools: NestJs.
Database: Mysql, Postgres, Mongo.
Tools: Git, Jira, Confluence, Slack, Postman.
Agile: Scrum.

PROFESSIONAL EDUCATION
- Full Stack Web Developer. Henry Bootcamp. 800 hours of theoretical-practical courses. 2023.
- Systems engineering. Buenos Aires' University. Jul 2023 - 2032

COMPLEMENTARY EDUCATION
- javascript course. Soy Dalto 2020.
- javascript course algorithms and data structures. Free Code Camp. 2020 .
- Todo Code algorithms course. Todo Code 2022

IDIOMAS
- English A2
- Native Spanish.
